The Irish Music and Dance Experience

July 27th to August 4th 2019

studio2stage

presents

‘Thats Dancing’

Sunday August 4th

Wilkin’s Theatre

Kean University

New Jersey, USA

**The Irish Music & Dance
Experience**

studio2stage is unique. It is a full scale show production experience for all Irish dancers and musicians who will become the cast of the live show performance on the final night which is open to the general public. This is an amazing vocational pre-tour and fact-finding opportunity for aspiring performers to become part of a professional Irish music and dance show production and to experience what it's really like to be in a touring production. Participants gain all the experience needed before attending their first big audition for one of the highly renowned touring shows, fully prepared and ready to succeed!

Our three world class musical directors and our four well known dance choreographers will work together with the students to bring out the best in each and every one, to foster, encourage and refine their talents and to help them achieve their dreams of performing in a live production.

The students will witness first hand, life as a professional, experience living away from home, making new friends, immersed in nine days of intense rehearsals and watching a full show production come to life! Students will also learn about stage production, choreography, line management, the role of a tour manager, the role of a dance captain, musical director, what to look for in their first touring contract and more! Acquiring a sound understanding of the business of performance is an absolute necessity for any 21st century performer.

This will be an opportunity for the musicians, singers and dancers to have a preview into the world of professional show performance. The knowledge and experience gained from studio2stage of the performance industry will allow students to focus more readily on what is important to them as performers.
